Extraordinary made simple™

**SMART**™

# The cost of meeting

If you work with a group of people, you have to hold meetings, there really is no way around it. But the way you conduct your meetings could save your organisation a fortune, simply by changing what hangs on your wall.

From remote collaboration regardless of distance, brainstorming sessions and productive meetings to interactive training, planning and decision making, there's no limit to what can be achieved with SMART Technologies.

SMART's award winning and affordable business solutions don't just transform your meeting and work spaces. They will also:

- Eliminate the need to travel for those who can't be, or don't need to be in the room
- Create a productive, interactive and engaging experience for those who do
- Provide future proof technology that not only looks amazing but...
- Proves its return on investment virtually in an instant

“After introducing this system my expenses dropped tenfold. You can imagine what the figures would look like if 4,500 employees all used the solution. If we rolled this out, suitable meeting rooms would need to be set up. Even though this would require an initial investment, the benefits outweigh the costs in every way.”

**Chris Hanson, Internal Sales Director, Computacenter**

“It was a no-brainer, really. Not only can we now process our work quicker, we need less people and roughly 25 per cent fewer meetings to do so.”

**Victoria Slight, Executive Assistant, Cable & Wireless**

“Since I started using the SMART Board™ interactive whiteboard, I have developed more interactive training techniques and the difference in atmosphere is dramatic.”

**Corporal Stuart Thorpe, Trainer, RAF.**

# Interactive displays

## SMART Board 600 series interactive whiteboard

The SMART Board™ interactive whiteboard acts as a projection screen for displaying a PC or laptop. Users can interact with the display using their finger to control on-screen applications or presentations. Pick up a pen from the SMART Pen Tray to make notes and annotations in digital ink over any application or whiteboarding page.

SMART Board interactive whiteboards are available in diagonal screen sizes 48", 64", 77", 87" and 94".

Warranty: 3 years return to base. Upgradeable to 5 years upon product registration, within 2 years of purchase.

### SMART Board 600i3 interactive whiteboard system

The SMART Board 600i3 interactive whiteboard system acts as a projection screen for displaying a PC or laptop. Users can interact with the display using their finger to control on-screen applications or presentations. Pick up a pen from the SMART Pen Tray to make notes and annotations in digital ink over any application or whiteboarding page.

As an all in one interactive whiteboard system, the 600i3 includes a SMART Board interactive whiteboard, a short throw UF55 projector and an extended control panel for inputting devices such as laptops, DVD players, document cameras and more.

SMART Board 600i3 interactive whiteboard systems are available in diagonal screen sizes 64", 77" and 87".

Warranty: 3 years onsite. A further 2 years return to base can be obtained on the board upon product registration within 2 years of purchase.

## Interactive displays

### SMART Board 685ix interactive whiteboard system

The SMART Board 685ix interactive whiteboard system is the latest addition to the SMART Board interactive whiteboard range.

The system offers a premium, wide-format projection screen with high-definition picture quality in addition to the features and functionality offered with the SMART Board 600i interactive whiteboard range. The system also benefits from a single button system-start-up for ease of use.

The 685ix includes an 87" (diagonal) widescreen SMART Board interactive whiteboard, an ultra-short-throw UX60 projector, and an extended control panel.

Warranty: 3 years onsite. A further 2 years return to base can be obtained on the board upon product registration within 2 years of purchase.

### SMART Board interactive display frame

The SMART Board interactive display frames provide interactive whiteboard functionality to existing plasma or LCD screens.

Connect to a PC or laptop and using DVIT™ Digital Vision Touch technology users can interact directly with the plasma or LCD display to control any computer application. Annotations can be made over any application or whiteboarding page in digital ink using a single pencil tool. Simply turn the pencil tool around to activate the eraser function.

SMART Board interactive display frames are available for select 42", 50", 58", 60", 63" and 65" plasma panels and 52" LCD panels.

Warranty: 3 years return to base.

## Interactive displays

### SMART Board for flat panel displays interactive whiteboard

The SMART Board for flat panel displays provides interactive whiteboard functionality to existing soft and hard-screen flat-panel displays, with screen surfaces not suitable for direct touch.

Once connected to a PC or laptop users can interact with any application using DViT technology through the displays protective glass layer. Pick up a pen from the SMART Pen tray to make annotations in digital ink over any application or whiteboarding page.

SMART Board for flat panel displays are available in sizes 32", 40", 42", 46", 50", 57", 58", 60", 61", 63" and 65".

Warranty: 3 years return to base.

## Interactive displays

### SMART Actalyst interactive digital signage

SMART Actalyst interactive digital signage solutions fit over select existing LCD and plasma panels, to create interactive information stations.

Using DViT technology, users can interact with the display using their finger to control on-screen applications and gain information such as product details, directions, check-in services or event and exhibition information.

SMART Actalyst interactive digital signage is available for select flat panel displays in sizes 32", 40", 42", 46", 50", 52", 57", 58", 60", 61", 63" and 65".

Warranty: 3 years return to base.

## Interactive displays

### SMART Podium interactive pen display

SMART Podium interactive pen displays provide interactive whiteboard functionality via an LCD display. Connect the interactive pen display to a SMART Hub or computer and projector to control and annotate over any application using the battery free tethered pen.

Users in different locations can create and join a collaboration session, using Bridgit™ conferencing software (page 17) and use the Podium to share and interact with content in real time as if they were in the same room.

SMART Podium interactive pen displays are available in sizes 15" and 17".

## Interactive displays

### SMART Podium ID422w interactive pen display

The SMART Podium ID422w interactive pen display is the latest addition to the SMART Podium range and offers users a 22" widescreen display with crystal clear, high-definition picture quality.

Connect to any widescreen device, SMART Hub or computer and projector, to control wide-format content such as video, HDTV and high-resolution images.

Access website content or multimedia files and make annotations in digital ink over any application or whiteboarding page.

Warranty: 3 years return to base.

# Collaboration Platforms

## SMART Hub VE220 collaboration platform

SMART Hub VE enables simple computer-free digital whiteboarding functionality, without the need for a dedicated meeting room PC.

Connect SMART Hub VE to a SMART Board interactive whiteboard and projector or interactive display to create a large interactive workspace with the ability to use whiteboarding, computer access or video functionality.

Make notes and annotations in digital ink, share content and save work to a USB key or distribute files by e-mail.

# Collaboration Platforms

## SMART Hub SE240 collaboration platform

SMART Hub SE works with any SMART Board interactive whiteboard or display and lets you create, share and distribute digital notes without the need for a PC or laptop.

In addition to the Hub VE's functionality, the Hub SE includes the ability to data conference and input additional video connections. Simply turn on the board and select what you want to do from the Hubs intuitive menu.

As well as working stand-alone, the SMART Hub SE can also be used to connect and display devices such as DVD players, document cameras, VCRs and amplifiers.

Warranty: 3 years return to base.

# Collaboration Platforms

## SMART Hub PE260 collaboration platform

SMART Hub PE works with up to four SMART Board interactive whiteboards or SMART displays and allows users to share and distribute digital notes without the need for a PC or laptop. Slide notes, documents and applications between screens, to share and work on several documents at once.

Built in data-conferencing allows users in different locations to share and interact with content in real time as if they were in the same room.

Warranty: 3 years return to base.

# Software

## SMART Meeting Pro collaborative meeting software

SMART Meeting Pro collaborative meeting software is installed onto a PC to provide a hassle-free collaboration platform at the touch of a button.

Meeting Pro collaborative meeting software works with a computer to connect SMART interactive displays and laptops. Local and remote participants can make, move and save notes on any screen or switch between desktop applications, whiteboard pages and data conferences from one user- friendly interface.

## SMART Bridgit conferencing software

SMART Bridgit conferencing software provides the data conferencing functionality behind SMART Hubs and SMART Meeting Pro collaborative meeting software. The software allows users to share voice, video, data or anything displayed on their desktop or interactive whiteboard, with anybody around the world using the internet.

Create or join a conference through a simple e-mail invitation. At any point, other meeting participants can choose to share their screen, or take control of the presenter's display.

## SMART Sync 2009 training room management software

SMART Sync 2009 training room management software allows users to connect to and control every other computer within their organisation or lab, to train, monitor and collaborate with groups. From the presenters screen desktops can be viewed as thumbnails or in a full-sized view by clicking on a selected thumbnail.

Lock or control screens to guide participants through tasks, restrict or block access to the Internet and applications, or send private or public questions through SMART Sync's chat menu. At the end of a session power-down all computers at the touch of a button.

## SMART Ideas concept-mapping software

SMART Ideas™ concept-mapping software allows users to better analyse and understand complex ideas by building multilevel interactive maps with dynamic multimedia tools.

Present information from a variety of perspectives using the diagram, outline, global or presentation views. Multilevel maps take users through concepts one level at a time for greater clarity, and easily convert into a multipage website which can be shared amongst the group.

# Accessories

## SMART Document Camera

The SMART Document Camera plugs into a computer or interactive display to display real-time images of any static or moving object for everyone to see.

The SMART Document Camera comes with the latest SMART Notebook software, which enables users to control the camera, capture images directly onto a Notebook page and annotate over them in digital ink. Capture images with SMART Notebook software and use them to create and save interactive lecture or training content for future use.

Warranty: 5 years return to base.

## SMART USB Speakers

SMART USB Speakers connect to a SMART Board interactive whiteboard through a single cable adding amplified sound to meetings and presentations. A DVD player or VCR can be connected to the speakers through an auxiliary input. The SMART USB Speakers can be mounted on to the SMART Board interactive whiteboard or directly on to the wall.

SMART USB Speakers also feature two USB Ports so users can share data to a storage device directly from the board.

### SMART AirLiner wireless slate

The SMART AirLiner™ wireless slate allows users to interact wirelessly with any SMART Board interactive whiteboard or SMART Podium interactive pen display, from up to 52 feet (16 m) away. Control any software application, or write notes and highlight information in digital ink using the battery-free tethered pen. Multiple slate users can write at the same time as someone at the display. Save work to a single file that can be used on both Microsoft Windows® and Apple Mac OS® operating systems.

Warranty: 3 years return to base.

## SMART Response interactive response system

SMART Response integrates seamlessly with any SMART Board interactive whiteboard or SMART display. Ask participants to respond to questions and create instant reports on the results or change the direction of the content based upon the needs of the audience.

SMART Response reports in a simple, clear format – on screen or on paper – The reports can be shared with participants and exported from Microsoft Excel® into other reporting software helping assess progress and plan future sessions.

Warranty: 3 years return to base.
