

HP Smart Printing Service

What is SPS?

No two companies' print requirements or mode of operations are the same, and that's why Computacenter work with HP to offer a tailored Smart Printing Service (SPS) – we recognise that one size does not fit all.

SPS is both a print and copy solution. Aimed at companies with 10 users or more, in any vertical, who wish to drastically cut their print costs, for a single monthly price it offers both peace of mind and cost efficiency with a pay as you use flexible term contract.

Why Computacenter?

As a HP Gold Preferred Partner and an accredited Office Printing Solutions Gold Preferred Partner, Computacenter is ideally placed to work with you on all your printing needs. Offering lower costs, more control of your print management and a single point of contact for equipment, supplies and service, it's no wonder so many companies choose Computacenter as their sole supplier.

When should SPS be considered?

If you have five or more workgroup printers or any MFP's, then this is a good indicator that SPS could play a valuable part in cutting printing costs for you.

Why switch to a pay-per-use contract?

Managing a fleet of print devices is very time-consuming. Ordering new toner and print cartridges, raising purchase orders for consumables, processing lots of separate bills, stockpiling toner cartridges, fixing faults – it all adds up. Ordinarily this would be extremely time consuming with many different contacts,

but with SPS you can leave it all to us, and only pay for the printing you actually perform.

Is SPS for me?

Whether catering for 10 or more users in a small to medium sized company or a workgroup in a larger organisation, SPS is an extremely flexible solution and its cost efficiency is clear to see.

HP level pay

To minimise costs, customers need to have more control on not only when and how they pay, but also what they pay for. HP level pay is your chance to take control:

- Usage based and you only pay for the supplies HP delivers.
- Fixed monthly cost, recalculated annually.
- Price based on assumed supply usage and estimated on the basis of the volume of material supplied per device.
- Additional usage is charged and if you don't use the full allocation it is settled the following year by the fixed monthly price being reduced.
- Fully automatic requests and proactive delivery of supplies is available as an option by means of HP Remote Monitoring.

Computacenter Accreditation

Large Format Printing Specialist

The Benefits of SPS with Computacenter

- Straight forward & underwritten = single contract
- Budgetary control and transparency = cost visibility
- Improved performance & quality = optimal management
- Reduced administration = electronic submission
- Print & copy combined = single agreement
- User accounting/chargeback = cost recovery
- Smoothed payment profile = no surprises
- Pay for actual usage = no hidden costs
- Flexibility to lease or buy = you choose
- Quote of forecasted expenditure = budgeting confidence
- Improved service levels = user satisfaction
