

HP Education Services

The best first step towards a
Virtual Server Environment

What is virtualisation?

Virtualisation is an approach to IT that pools and shares resources so utilisation is optimised, supply automatically meets demand and costs are reduced.

However, creating virtual resource pools is not just about technology; it is a way of thinking about IT infrastructure. To truly take advantage of the innovations that come to market, enterprises must focus their people and processes, as well as the technologies, on that goal.

The best first step is education. Explaining the approach and steps that lead to virtualisation will allow your IT organisation to strip away the hype and focus on the real value of this solution.

Virtual Server Environment (VSE) curriculum

Our curriculum starts with an online, strategic overview that explains what VSE is and how it can benefit your business. Next, we offer a scenario-based course on Capacity Advisor to demonstrate the effect that embarking on a virtualisation journey has on your business. Following this are courses that dive deep into the specific technology components for control, availability and partitioning. We continue to add new courseware all the time.

Why HP Education Services?

With 30 years of experience in high-tech education, HP offers high-quality courses taught by experienced instructors, with plenty of hands-on lab time (even in live, online courses). Our courses are taught in a variety of formats – from traditional classroom learning at one of our training centres or at your location, to online self-paced, and online live, instructor-led courses that include live, remote lab experience – plus customised learning solutions tailored to your particular needs.

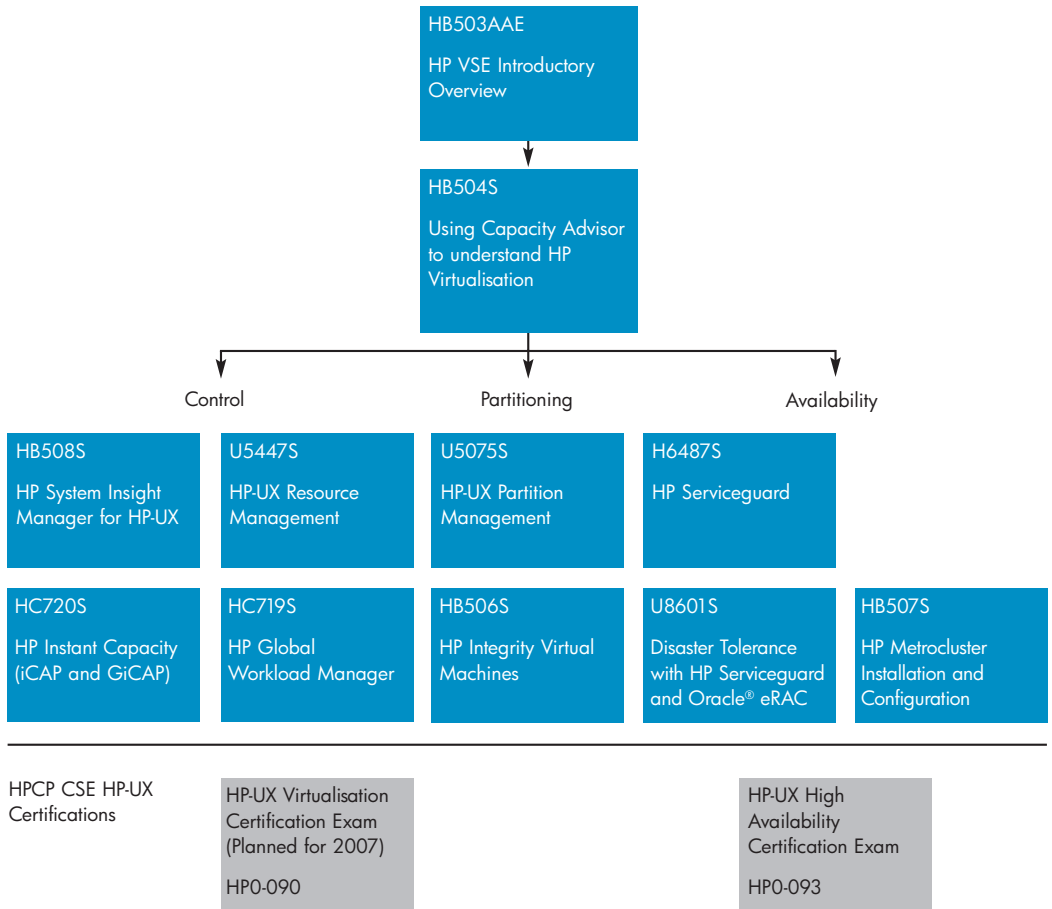

Beyond VSE

The journey to becoming an adaptive enterprise that takes full advantage of virtualisation goes well beyond your servers. From servers to storage, from HP OpenView to IT Service Management (ITSM), HP has the hardware, software, services and the training to get you there.

Flexible purchase options

You can arrange for HP training in two ways: purchase job-focused courses individually, or contract for an HP Care Pack. HP Care Pack Total Education is a prepaid, packaged service that can be used for any of the scheduled courses offered at HP education centres, as well as online live or self-paced courses. It provides the greatest flexibility for training your entire team.

HP VSE Curriculum Path

To purchase and register
